

YOUR LIFTING SOLUTION

WHEN THE POWER GOES OUT

For use with models: CL10AV3 Series, CL10VA3-DPC, Series, VLE10, SA10, EQ10, CL12A Series, LE12, EQ12, E15, CL16-3S, CL20; 4115 and 7,000 - 9,000 lb. home storage lifts

NEW BLACK OUT KIT

Challenger's new Blackout Kit was designed to eliminate the concern that a customer's vehicle might be stuck lifted during a power emergency. Instead, lifts prepped with the CL Lift Prep Kit can be manually lowered in the rare event of a facility power outage.

The lightweight, easy-to-carry Pump Kit comes with a custom bag for storage convenience. It is intended for use by properly trained technicians.

KITS INCLUDE:

Lift Prep Kit: Stay connected to the power unit of each lift and is ready for the hand pump to be connected.

- » **Includes:** hoses, connectors, valve and quick-disconnects that attach directly to each lift
- » Each lift requires one Lift Prep Kit
- » **Part Nos:** 10702, 10701

Pump Kit: Connects directly to a prepped lift without tools via quick-disconnects.

- » **Includes:** a High Pressure portable manual hand pump, attachment hoses, hydraulic connectors, high pressure flow control device and a tote bag
- » Each facility requires a minimum of one pump kit
- » **Part No:** 10700

CL Black Out Kits must be refilled with hydraulic fluid after each use.
