

# Tolt Boom Attachment

LK4036

## FEATURES

The LK4036 Tilt Boom Attachment is designed to tilt and lock a pickup box in an upward position for restoration work, sandblasting, painting, rust-proofing and under box repairs. Adding the Tilt Boom should only take a few minutes once you familiarize yourself with the components that need to be changed. Once the box is tilted in the upward position, the safety pin that is included is to be inserted to lock the lift in its position for Operator safety. The Tilt Boom Attachment connects to the Lift King Main Component in a matter of seconds by setting in its designated position and only the addition of one pin. The Tilt Boom Attachment makes it easy to tilt the pick-up box in and upward with only one Technician and no human lifting strain.

Built with steel construction

Durable powder coat

Only one pin required for set-up

Sets-up in seconds
