

DESIGNED BY USERS, FOR USERS

Innovates
in **maintenance**
products.

ERGONOMIC & EASY TO USE

Hermetic lid

> Limits evaporation, with preparation tray on the side for parts pre- and post-cleaning

User-friendly control unit

> Digital screen with Boost mode and Eco mode, tool-free interchangeable control unit

Fully equipped cleaning table

> Modular shelving system, brush, sprinkler and large soaking capacity with stirring option

Eased maintenance

> Mid-height drain tap, washable and reusable 100µm cartridge filter

MACHINERY MONITORING

check'it AVAILABLE ON  & 

Monitoring & management of machinery:
Verification at each visit via the mobile app
Visualisation & management of the machine fleet via a web interface

Ocean Coral®
The biological parts washer 3.0

instr.xyz/u/nenoc

NEXT GENERATION BIOLOGICAL PARTS WASHER - MASTER VERSION

The **Ocean Coral®** parts washer works through a combination of BlueLiquid® cleaning solution, non-toxic and non-flammable, coupled with BlueTablets® microorganism tablets, which break down dirt and continuously regenerate the cleaning bath. It is an **ideal, effective and economical solution** for all professionals concerned with protecting their health and the environment.

THE PROBLEM WITH SOLVENTS

Traditional solvents are still frequently used in workshops and garages to clean various parts, creating **risks to the health and safety of operators**. These products are **toxic, flammable and harmful to health** through contact or inhalation.

They are **restrictive when it comes to upgrading facilities and eliminating waste**.

They are also the source of **environmental risks**: accidental spills and release of volatile organic compounds (VOCs).

Toxic

Flammable

Harmful to health

THE BIOLOGICAL PARTS WASHER PROCESS

The biological parts washer works with a BlueLiquid® pH neutral cleaning solution regulated at 38°C, that is solvent-free, non-toxic and environmentally friendly, and BlueTablet® microorganism tablets which break down dirt and continuously regenerate the solution. This process guarantees **effective cleaning**, with no residue on the parts, and helps **limit consumption, maintenance and waste**.

Ocean Coral® THE BIOLOGICAL PARTS WASHER

The ergonomic design of this washer offers various cleaning and filtration systems and a user-friendly control unit.

BlueLiquid® CLEANING SOLUTION

An aqueous formula made up of specific, non-toxic and non-flammable surfactants that loosen and break down dirt.

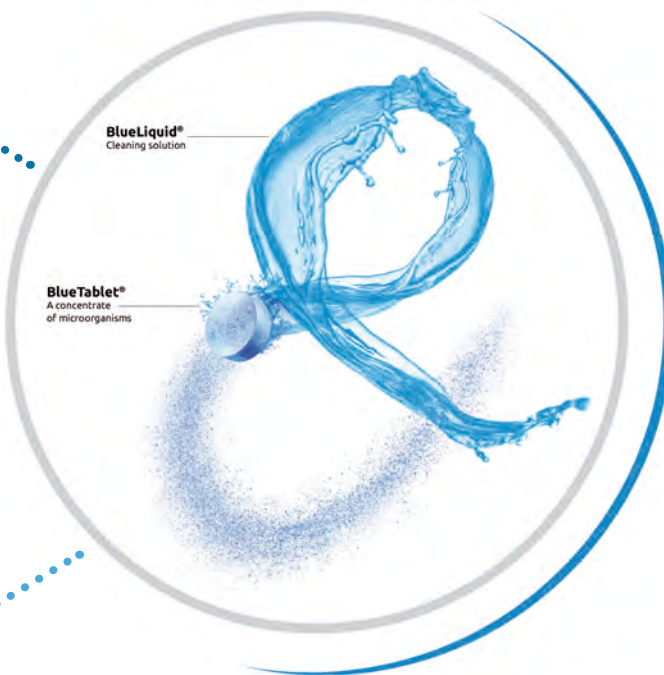

BlueTablet® A CONCENTRATE OF MICROORGANISMS

Biodegradation of dirt, continuous purification of the cleaning bath.

BLUEREMEDIS® Technology
Keep constant cleaning efficiency

The addition of the tablet enables the solution to regenerate and ensures consistent quality of cleaning.

THE BENEFITS OF THE BIOLOGICAL PARTS WASHER

1

Environmentally friendly & Solvent-free

Non-toxic and non-flammable solution -
No risk for the environment, no VOC release

2

Effective

Efficient cleaning, with no residue on parts -
Consistent cleaning quality over time

3

Economical

No restrictions in terms of upgrading facilities -
Limited maintenance, waste and reprocessing costs
