PUTTING AN END TO SOLVENT-BASED PRODUCTS

Traditional solvents, widely used in workshops for parts cleaning, present serious **health and safety risks** for operators. Harmful by contact or inhalation, also flammable, a source of accidental spills and releases of volatile organic compounds.

The use of solvents has numerous regulatory constraints in terms of compliance with **factory standards** and **waste treatment**.

ALL-IN-ONE CLEANING AREA

The **Ocean Lagoon®** portable parts washer is a self-contained workspace that is extremely easy to deploy, reliable and robust.

The entire cleaning flow is at your fingertips, to help you organize your workshop.

ADVANTAGES OF THE PORTABLE BIO PARTS WASHER

The **Ocean Lagoon** concentrates the superior features of the Ocean Range of Biological parts washers and incorporates the key features of **safe, non-flammable, solvent-free cleaning solution** and the bio-remediation tablets. Our **micro-organisms** have been selected to perform at room temperature. The micro-organisms work to extend the life to the cleaning solution.

SAFETY

Water-based, pH-neutral, solvent-free, non-toxic, non-flammable cleaning solution.

EFFICIENCY

Powerful formula based on specific and synergistic surfactants that remove dirt.

USER-FRIENDLY

An innovative, compact, user-centric design that fits in anywhere in the workshop and beyond.

THE BIOLOGICAL CLEANING PROCESS

Ocean Lagoon®

A portable, versatile parts washer that combines all the advantages of the Ocean range.

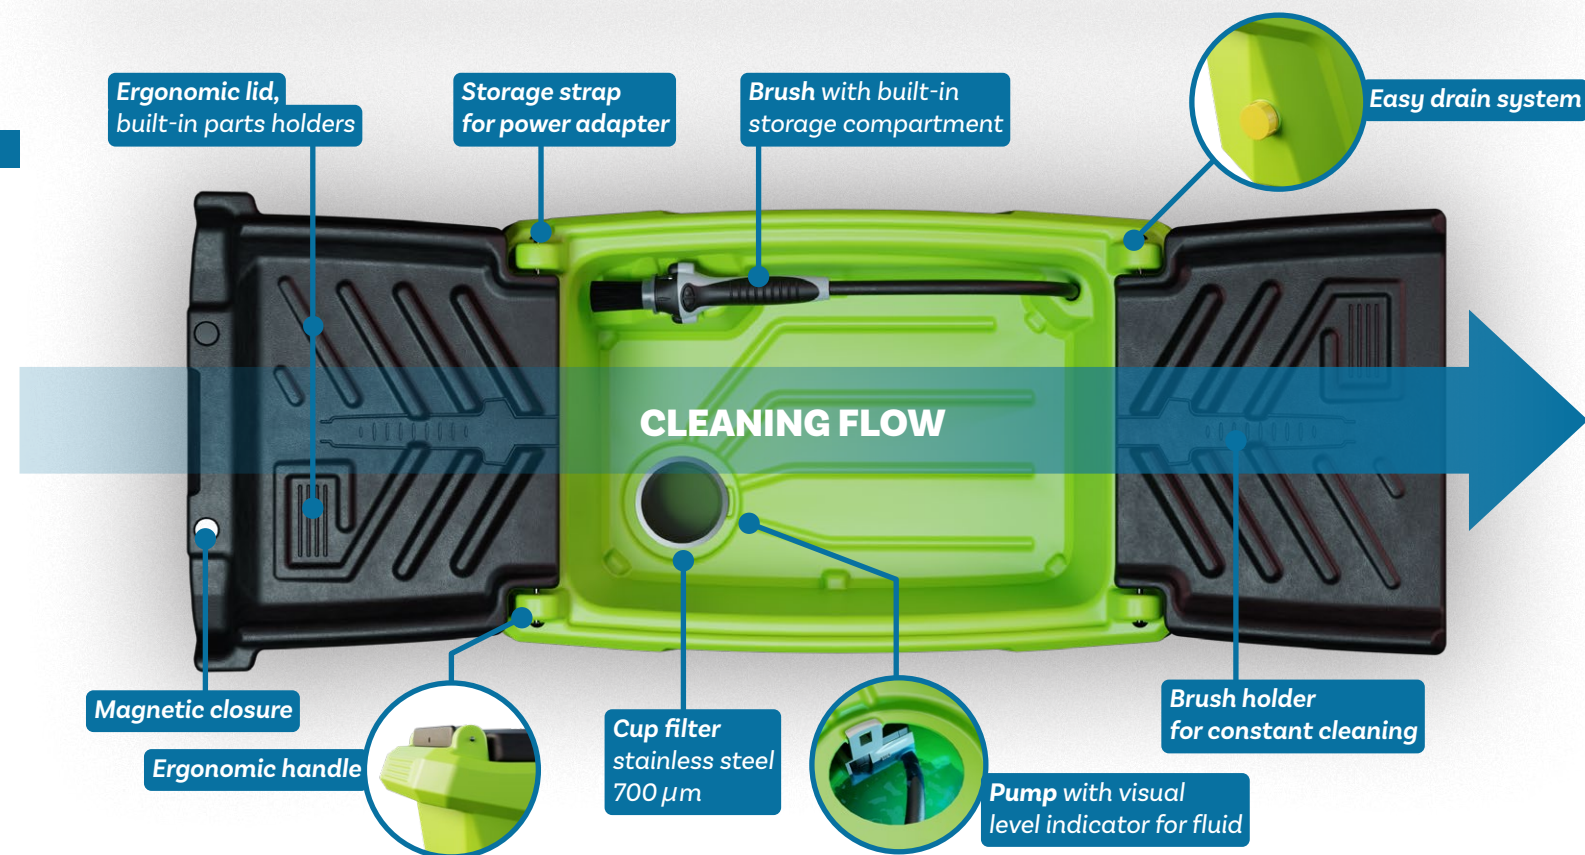

blueLIQUID®

Non-toxic, non-flammable, solvent-free water-based cleaning solution.

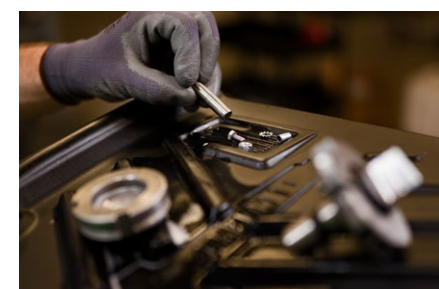

clearTABS®

A concentrate of micro-organisms that cleans and regenerates the cleaning bath.

SMART

With users in mind, this clever, all-in-one design offers a clear and legible workflow.

MOBILE

Easy to carry around the workshop and in your vehicle, take the Lagoon with you wherever you go.

SIMPLE

Easy access and handling, simple maintenance, cold cleaning, easy draining, instant deployment.
