

OCEAN SUNSET

The biological parts washer cleans your parts without any solvent while respecting operators' health and the environment.

This new generation of parts washer works with a cleaning solution based on a natural regeneration using micro-organisms to transform pollutants into food and energy.

Cleaning solution:
BLUELIQUID

Tablets of micro-organism:
BLUETABLETS

Technical data sheet

Parts washer dimension	35.7 × 25.6 × 43.7 in (closed lid)
Working area dimension	31.1 × 16.5 × 7 in
Empty weight	88 lbs
Tank capacity	26 gal
Soaking area volume	8 gal / 31.1 × 16.5 × 3.5 in
Pump flow	300 gal/h
Heating power	1 kW
Electric consumption	4,3 kWh/j
Payload	220 lbs
Standard temperature	100°F and 109°F in Boost mode
Composition	PE
Tool holder	Interchangeable brush
Stainless steel filtration	0.03 in basket filter + 0.004 in external filter
Power supply	110 V≈

Biological parts washer
Without solvent

TECHNICAL DATA
SHEET

Technical description

SOAKING AREA
Hidden-time work.

HERMETIC LID
Limits the evaporation of the solution.

DRAINAGE AREA
Built-in lid rest.

BOOST MODE
Increases temperature and degreasing power.

EASY MAINTENANCE
Interchangeable electromechanical housing without tools.

BACKLIT SCREEN
Give instructions to the operator.

GARAGE TRUCK
Eased maintenance.

ECO MODE
Minimizes power consumption (20 %).

ERGONOMIC CLEANING TABLE
Protection of the cleaning tools.

Options

BAG FILTER
Increases product filtration.

DRAINER
Enabled clean parts to be deposited in the work area for drying.

PEDAL SWITCH
Used to operate the pump by foot.
