

DESIGNED BY USERS, FOR USERS

ERGONOMIC & EASY TO USE

Hermetic lid

> Limits evaporation and has a built-in parts holder

User-friendly control unit

> Digital screen with Boost mode and Eco mode, tool-free interchangeable control unit

Fully equipped cleaning table

> Brush protection, built-in soaking area which enable hidden-time work

Eased maintenance

> Drain tap with liquid level, permanent washable and reusable filter

MACHINERY MONITORING

NEXT GENERATION BIOLOGICAL PARTS WASHER - COMPACT VERSION

The **Ocean Wave[®]** parts washer works through a combination of BlueLiquid[®] cleaning solution, non-toxic and non-flammable, coupled with BlueTablets[®] microorganism tablets, which break down dirt and continuously regenerate the cleaning bath. It is an **ideal, effective and economical solution** for all professionals concerned with protecting their health and the environment.

SRI_PLQ_V1 Brochure Ocean Wave October 2019

THE PROBLEM WITH SOLVENTS

Traditional solvents are still frequently used in workshops and garages to clean various parts, creating **risks to the health and safety of operators**. These products are **toxic, flammable and harmful to health** through contact or inhalation.

They are **restrictive when it comes to upgrading facilities and eliminating waste**. They are also the source of **environmental risks**: accidental spills and release of volatile organic compounds (VOCs).

Toxic

Flammable

Harmful to health

THE BIOLOGICAL PARTS WASHER PROCESS

The biological parts washer works with a BlueLiquid® pH neutral cleaning solution regulated at 38°C, that is solvent-free, non-toxic and environmentally friendly, and BlueTablet® microorganism tablets which break down dirt and continuously regenerate the solution. This process guarantees **effective cleaning**, with no residue on the parts, and helps **limit consumption, maintenance and waste**.

Ocean Wave® THE BIOLOGICAL PARTS WASHER

The ergonomic design of this washer offers various cleaning and filtration systems and a user-friendly control unit.

BLUEREMEDIS® Technology
Keep constant cleaning efficiency

BlueLiquid®
Cleaning solution

BlueTablet®
A concentrate of microorganisms

BlueLiquid® CLEANING SOLUTION

An aqueous formula made up of specific, non-toxic and non-flammable surfactants that loosen and break down dirt.

BlueTablet® A CONCENTRATE OF MICROORGANISMS

Biodegradation of dirt, continuous purification of the cleaning bath.

The addition of the tablet enables the solution to regenerate and ensures consistent quality of cleaning.

THE BENEFITS OF THE BIOLOGICAL PARTS WASHER

1 Environmentally friendly & Solvent-free

Non-toxic and non-flammable solution -
No risk for the environment, no VOC release

2 Effective

Efficient cleaning, with no residue on parts -
Consistent cleaning quality over time

3 Economical

No restrictions in terms of upgrading facilities -
Limited maintenance, waste and reprocessing costs
