

OCEAN WAVE

The degreasing and biological parts washer cleans your parts efficiently without any solvent while respecting the operator's health and the environment.

This new generation of machine works with a surfactant-based cleaning solution, coupled with tablets of micro-organisms that degrade hydrocarbons.

Cleaning solution:
BLUELIQUID

Tablets of micro-organism:
BLUETABLETS

Technical data sheet

Parts washer dimensions	31.3×24.5×43.2 in (hood closed)
Working area dimensions	27.1×16.9×7.5 in
Empty weight	57.3 lbs
Tank capacity	21 gal
Soaking area volume	3 gal / 10.2×10.6×5.5 in
Pump flow	300 gal/h
Heating power	1 kW
Electric consumption	3.6 kWh per day
Payload	175 lbs
Standard temperature	100°F and 109°F in Boost mode
Composition	PE
Tool holder	Interchangeable brush
Stainless steel filtration	0.03 in basket filter + 0.002 in socks filter
Power supply	110 V≈

Parts washer technical sketch

Technical description

SOAKING AREA
Allows you to clean in hidden time.

HERMETIC LID
Limits the evaporation of the solution.

DRAINAGE SYSTEM
Eased maintenance & handling.

BOOST MODE
Increases bath temperature to 43°C and improves cleaning efficiency.

EASY MAINTENANCE
Electromechanical housing interchangeable without tools.

USER FRIENDLY CONTROLS
Give instructions to the operator.

DRIPPING AREA
Lid integrated workpiece.

ECO MODE
Lowers bath temperature to reduce electricity consumption (20%).

ERGONOMIC CLEANING TABLE
Protection of the cleaning tools.
