Super-Duty Transmission Jack with 3,000-lb. Lifting Capacity

The beefed-up RTJ-3000 was designed for those specialty jobs for which a normal [transmission jack](#) just won't cut it. Its 1.5-ton capacity makes short work out of just about any automatic transmission, transaxle or other drive-train component with light trucks, passenger cars and vans.

The same safety features also bring the same design aspects: 75.25" rise, dual handles for secure, safe mobility, two-stage hydraulic lifting, rugged anchor chains and safety overload system you'll be thankful for when working with the heavy stuff. Its generous maximum lifting height makes it ideal for working under full-rise two-post lifts and four-post lifts.

Features

- Foot -operated pump
- Alloy-plated ram
- Extra-wide base
- Safety overload system
- Heavy-duty steel swivel casters
- One push/pull handle
- Heavy steel construction for maximum durability
- Sealed hydraulic unit prevents contamination
- Double-sealed hydraulics for longer service life
- Heavy-duty chain anchors keep loads secure
- Steel roller bearings are included underneath the table and on the ends of the adjustment screw to minimize friction and allow for effortless table adjustment
- Adjustable universal saddle adapts to passenger car and light truck automatic transmissions
- Fine-thread adjustment screws with oversized knobs make adjusting the table a cinch
- Two-stage design provides an extended height of over 75.25"
- Hardened chrome-moly ram prohibits rust from entering hydraulic system
- Convenient pull handle for extra stability and control
- Overload Safety System prevents the jack from being used beyond its rated capacity

Specifications

1st Stage Lifting Capacity	3,000 lbs. (1,361 kg)
2nd Stage Lifting Capacity	2,000 lbs. (907 kg)
Lowered Height	35-1/2" (902 mm)
Raised Height	75-1/4" (1,911 mm)
Base Dimensions	34" x 34" (864 mm x 864 mm)
Shipping Weight	232 lbs. (105 kg)
Shipping Dimensions	16" x 23" x 40" (406 mm x 584 mm x 1,016 mm)
