Quick-Peel™ Segmented Adhesive Steel Wheel Weights

Many states are banning the use of lead wheel weights. Ranger steel weights come in black and silver. Our [Stick-On Steel Wheel Weights](#) offer the best overall fit, as well as the most reliable and cost-effective choice. Ranger steel wheel weights are designed to have less impact on the environment and are corrosion resistant.

Our .25 oz. wheel weights are perfectly sized and weighted for most wheel balancing applications, and when paired with a Ranger wheel balancer, you'll never use more weight than necessary for the job. Our adhesive is extra-sticky, lessening the chance of the weight falling off the wheel and improving your level of customer service. Customers will know the quality difference when you service their vehicle with Ranger wheel weights.

Features

- Silver and black powder-coated surface helps eliminate corrosion and staining of expensive wheels
- Strong adhesive backing for dependable attachment
- Quick-Peel™ liner for trouble-free use
- Lead-free, steel construction has less impact on the environment
- Meets national environmental laws and health and safety codes
- Designed to have same fit, function & look as OEM weights
- Narrow profile contours easier to OEM wheel shapes
- Slender profile and out-of-sight mounting capability enhance the looks of any wheel
- Low-profile design for increased clearance of close-proximity calipers or brake components
- Self-dispensing carton features Free-Glide™ center hub and nylon feeder for smooth, jam-free delivery
- Reduces inventory cost by eliminating traditional wheel weight inventories and requiring less floor space
